Can angiogenesis be exploited to improve stroke outcome? Mechanisms and therapeutic potential
by M. Slevin, P. Kumar, J. Gaffney, S. Kumar and J. Krupinski
Published on the Internet 15 August 2006, doi:10.1042/CS20060049

Are the lipid-modifying effects of fibrates mediated by alterations in plasma lipid transfer activity?
by G. F. Lewis (see accompanying paper, pp. 193–199)
Published as Immediate Publication 9 June 2006, doi:10.1042/CS20060140

β-Adrenergic receptor blockers and the treatment of vasovagal syncope: more nails in the coffin!
by C. J. Mathias (see accompanying paper, pp. 209–216)
Published as Immediate Publication 18 July 2006, doi:10.1042/CS20060174

Relationships between changes in plasma lipid transfer proteins and apolipoprotein B-100 kinetics during fenofibrate treatment in the metabolic syndrome
Published as Immediate Publication 16 May 2006, doi:10.1042/CS20060072

Body composition and the apoB/apoA-I ratio in migrant Asian Indians and white Caucasians in Canada
by J. Smith, K. Cianflone, M. Al-Amri and A. Sniderman
Published as Immediate Publication 22 May 2006, doi:10.1042/CS20060045

Failure of propranolol to prevent tilt-evoked systemic vasodilatation, adrenaline release and neurocardiogenic syncope
Published as Immediate Publication 24 April 2006, doi:10.1042/CS20060017
Modification of the pulmonary renin–angiotensin system and lung structural remodelling in congestive heart failure
by F. Lefebvre, A. Préfontaine, A. Calderone, A. Caron, J.-F. Jasmin, L. Villeneuve and J. Dupuis 217–224
Published as Immediate Publication 27 April 2006, doi:10.1042/CS20060027

Direct comparison of relaxation and cGMP production in human coronary by-pass grafts in response to stimulation with natriuretic peptides and a nitric oxide donor
Published as Immediate Publication 18 May 2006, doi:10.1042/CS20060034
