Correction: Gender-specific medicine in the genomic era

Marianne J. Legato

Volume 130 (2016) pp 1–7

Owing to an error introduced during the production process, the word ‘impact’ was replaced incorrectly with the word ‘affect’ in the following two sentences (the correct versions of both sentences appear here).

1. Section heading: “What defines the phenotype? Nature or nurture?” (page 4)

“The idea that the environment also made a substantial contribution to form and function was eloquently advanced, its advocates maintaining that biomedical investigators were largely ignoring its impact.”

2. Section heading: “Male or female? Two distinct categories or continuum?” (page 5)

“The report will have significant impact.”
