COMMENTS

Magnesium and airway reactivity
by J. Hill 111–112
(see accompanying paper pp. 137–142)

Time for a lower blood lead action level for children?
by M. White 113
(see accompanying paper pp. 219–223)

REVIEWS

In utero programming of chronic disease
by D. J. P. Barker 115–128

Usefulness of markers of cell proliferation in the management of pituitary adenomas

PAPERS

Bronchial reactivity and intracellular magnesium: a possible mechanism for the bronchodilating effects of magnesium in asthma

Possible interaction between exposure to environmental tobacco smoke and therapy in children with asthma
by J.-C. Dubus, C. Oddoze, M. Badier, C. Guillot and B. Bruguerolle 143–149

Effect of endothelin-1 on endothelium-derived vascular responsiveness in man
by H. Krum, N. Cranswick and A.-M. Pellizzer 151–155

Effect of salt-loading on blood pressure, insulin sensitivity and limb blood flow in normal subjects
by M. Foo, A. E. Denver, S. W. Coppack and J. S. Yudkin 157–164

Characteristics of small bowel motility in patients with irritable bowel syndrome and normal humans: an Oriental study
by C.-L. Lu, C.-Y. Chen, F.-Y. Chang and S.-D. Lee 165–169

A method for examining differential mRNA expression along the crypt–villus axis of the human small intestine
by E. Chua, Q. Wang, P. O‘Toole and M. Lombard 171–177
Rat hepatic stellate cell expression of α2-macroglobulin is a feature of cellular activation: implications for matrix remodelling in hepatic fibrosis

Inter-α-inhibitor in calcium stones

Activation of myocardial and renal natriuretic peptides during acute intravascular volume overload in dogs: functional cardiorenal responses to receptor antagonism

Control of the forearm microcirculation: interactions with measures of obesity and noradrenaline kinetics

Central cooling effects in patients with hypercholesterolaemia
by F. De Lorenzo, M. Mukherjee, Z. Kadziola, R. Sherwood and V. V. Kakkar 213–217

Blood lead in U.K. children – time for a lower action level?
by J. O’Donohoe, S. Chalkley, J. Richmond and D. Barltrop 219–223

Proteasome blockers inhibit protein breakdown in skeletal muscle after burn injury in rats

SUPPLEMENT 39
Communications for the Spring Meeting of the Medical Research Society on 20 May 1998 at the Royal College of Physicians, London 1–22p
